Dear Emperor,

Let me talk about my skills.

Quarto

Quarto enables you to weave together content and executable code into a finished document.
To learn more about Quarto see <https://quarto.org>.

Typst

You can check Quarto Typst documentation at <https://quarto.org/docs/output-formats/typst.html>.

- This is a list
 - This is second-level list
 - This is third-level list?

Add Callout Title

1. Numbered list 1
2. Numbered list 2

Tip

- Bold font **works?**
- Italic font *works?*
- Striketrough font ~~works?~~
- Source Code (Monospace works with backticks `)`

Here is a span with a green.

Horizontal Rules:

You can hyperlink as [Link](#) here.

This is quoted text.

- Jihong Zhang

Running Code

When you click the **Render** button a document will be generated that includes both content and the output of embedded code. You can embed code like this:

```
library(ggplot2)
ggplot(mtcars, aes(x = mpg, y = disp)) + geom_point()
```

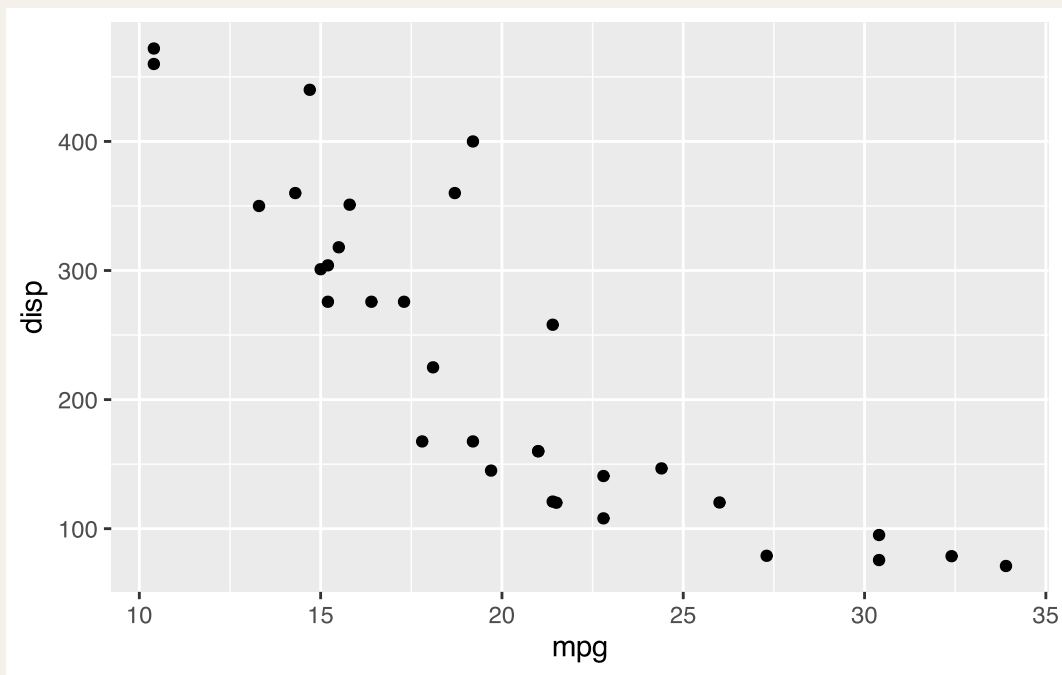

Figure 1: My Plot

You can also cite your plot Figure 1.

You can add options to executable code like this

```
[1] 4
```

The `echo: false` option disables the printing of code (only output is displayed).
